IN THE CLAIMS

Please amend the claims to read as follows:

Claims 1-24 Cancelled

Claim 25 (Original). A method for directed information delivery to a host system comprising:

detecting the attachment of a hardware device to a host system;

querying the hardware device for device information;

establishing a connection with a remote server system;

forwarding to the server system host related information including device information; and

delivering to the host system display information based on said information forwarded to the server.

Claim 26. (Original) The method of claim 25 further comprising:

said server system searching the world wide web for information that are relevant to said host related information; and

aggregating results of said search into display information for delivery to the host system.

Claim 27. (Original) The method of claim 26 wherein:

said host related information includes specifications about the host systems limitations.

Claim 28. (Original) The method of claim 27 further comprising:

formatting the display information to meet the host system's limitations.

Claim 29. (Original) The method of claim 28, wherein:

the host system's limitations relate to the host system's display limitations.

Claim 30. (Original) The method of claim 28, wherein:

the host system's limitations relate to data communication limitations between the hosts system and the server system.

Claims 31-33. (Cancelled)
